## Welcome to the *ClearSight* Portal!

Online kindergarten through high school assessment solutions

### Actions: Get Started

Educators enter here to use ClearSight.

### ClearSight Clicks

View short user videos for each system.

### New Users Required Course (30 mins)

Complete this training to administer tests.

### Practice Tests

Visit the practice tests to see example tests and to interact with the system.

### Unpack ClearSight

Learn what is included in ClearSight.

### Announcements

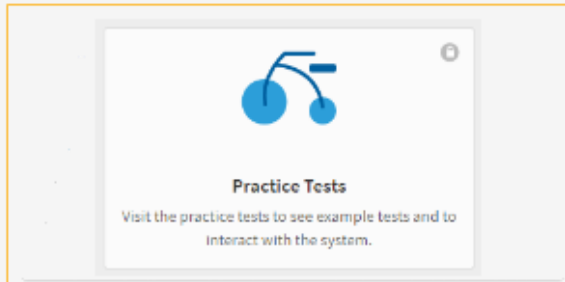

**GENERAL INFO**  
**ClearSight Will Not Be Available**  
**Midnight on July 17 through**  
**Midnight on August 1.**  
7/8/2021  
Reminder, ClearSight 2020-2021  
Year ends July 17, 2021

Thank you for using ClearSight this year.

[Find More](#)

This is the *ClearSight* home page. This page is meant to do two things. First, it provides regular users a quick way to access what they typically use—this is done through the Actions link in the middle of the page, OR with one click in the top navigation, a user can get to any other area. Second, it provides public users with quick access to areas like Practice Tests. The New Users Required Course is located here for easy access by new users from districts and schools.

## Practice Tests

### Access the Practice Test

Once on the practice test sign in page, make sure the "guest user" and "guest session" sections are both on, and then proceed directly to "sign in" to view the test.

Users must use a supported browser or web browser to access the Practice Test site. For more information, refer to the Supported Browsers page.

[VIEW SUPPORTED BROWSERS](#)

### About the Practice Test

- Tests are not meant to represent exact content that is taught in class.
- If a question appears too difficult, encourage students to experiment with the tools, choose the best answer, and move on to the next item.

This is the public practice test page, accessible by anyone from the home page. This page supplies some information about the practice tests and access to the practice tests by selecting the Practice Test card.

## Actions

Online kindergarten through high school assessment solutions

### Testing

#### Author/Create

Author or Create items, stimuli, tests and share them with colleagues.

#### Administer a Practice Test

Start and proctor a practice test session to prepare students for an administration.

#### TIDE (Student & User Management)

Set-up, review, and change users as well as monitor test administrations.

#### Test Administration

Schedule sessions or assignments and administer tests.

#### Checkpoint Previewing System

Preview the Checkpoint Assessments before or after you administer them.

Thank you for using Cl

Actions is the page that you will likely visit most often. There are two main sections on this page.

- Testing
- Reporting

In the Testing area:

- Author/Create – This is where users go to author items and create tests.
- Checkpoint Previewing System – This is where users go to preview all tests except Formative Science and Interim tests.
- Practice Test Administration – This is the specific area for educators to use to assign practice tests to their students. It mirrors the testing environment, so both the educators and students practice all the steps involved in test taking.
- Test Administration – This is where users go to start and administer tests to students.
- TIDE – This is the system where users and students are entered, settings are configured, and some test monitoring is done.

In the Reporting area:

- Reporting – This is where users find reports once test administrations have been completed.
- Inbox – This is where users can find reports that they downloaded or exported to Excel, CSV, or PDF. This is usually done so reports can be viewed outside of the system. Reports stay in the inbox for 29 days.

### Reporting

#### Reporting

View and/or print reports for test administrations.

#### Inbox

Find your previously run reports and any files exchanged with ClearSight staff.

**Frequently Asked Questions**

Answers to frequently asked questions are available for the following topics:

Assessments	Jul 2, 2021
Features and Functionality	Jul 2, 2021
<b>General Information</b>	Jul 2, 2021
Support and Training	Jul 2, 2021

The FAQs page is organized by categories; these can be selected under the main Frequently Asked Questions Header.

Select the FAQ category to expand it and view the questions and answers.

If you would like to print out the FAQs, simply press Ctrl+P and use your device's printing prompt to print.

Indiana or [Florida](#).' The second question is 'What is ClearSight and who should use it?'. The answer states: 'ClearSight is a digital assessment platform for districts and/or schools to administer fixed-form and adaptive assessments across subjects and grades. ClearSight provides actionable, immediate data to teachers. ClearSight has an educator authoring tool that can be used by educators to create items and/or tests that they can use in their classrooms and share with others. Districts, schools, or teachers who are interested in administering premade, state standards-aligned assessments can use ClearSight to track student's mastery of grade-level standards and to inform instruction during the school year.' An orange arrow points from the 'General Information' topic in the left-hand screenshot to this section."/>

< [Back](#)

FAQ

**General Information**

Jul 2, 2021

**To what standards are ClearSight items aligned?**

ClearSight aligns items to your state's standards so you will see your state standards in the reporting and authoring areas of the system when you view information about assessments and items. If there is not an alignment to your state's standards, you will see Common Core information for that item.

There are now comprehensive lists available, by checkpoint form name, which provide item sequence and the standard for each item. You can view these lists by selecting [Indiana](#) or [Florida](#).

**What is ClearSight and who should use it?**

ClearSight is a digital assessment platform for districts and/or schools to administer fixed-form and adaptive assessments across subjects and grades. ClearSight provides actionable, immediate data to teachers. ClearSight has an educator authoring tool that can be used by educators to create items and/or tests that they can use in their classrooms and share with others. Districts, schools, or teachers who are interested in administering premade, state standards-aligned assessments can use ClearSight to track student's mastery of grade-level standards and to inform instruction during the school year.
