

## August 2020 Release Notes

*ClearSight* is thrilled to be releasing new updates to every system. However, as systems were readied, and testing completed, we found a few things that require maintenance. Please see the table below for the descriptions of the issues we are working and what you can do to navigate the issue. As issues are rectified, we will update these release notes. Any questions can be directed to the Help Desk.

System	Issue	Impact to User	Suggested Work Around
<b>Practice Test Administration</b>	Requires students to take an on-grade practice test.	When Proctoring a practice test, teachers can only administer on-grade practice tests that are the same grade as their students.	If you would like students to experience off-grade practice tests, use the <a href="#">Guest Practice Test</a> option.
<b>New Users Required Course (previously Test Administrator Training)</b>	This training refers to some things that are not relevant to <i>ClearSight</i> as this is a tutorial used across multiple platforms.	There are very few instances known: <ol style="list-style-type: none"> <li>1. Training refers to student eligibility – not relevant in <i>ClearSight</i>.</li> <li>2. Training refers to accessing systems on the <i>ClearSight</i> HOME PAGE. In <i>ClearSight</i>, systems are found on the Actions page.</li> </ol>	<ol style="list-style-type: none"> <li>1. Please ignore the reference to student eligibility.</li> <li>2. Please use the <a href="#">Actions</a> page on the portal to access systems.</li> </ol>
<b>TIDE</b>	Under the Preparing for Testing Section, on the Students menu, there is a new selection called Custom Attribute Upload. This is not active or required for <i>ClearSight</i> at this time.	There is a pilot occurring for some new features and this Custom Attribute Upload is being used as part of the pilot. There is NO impact to customers.	Do not use or try to access Custom Attribute Upload as it is irrelevant at this time.
<b>Checkpoint Previewing</b>	<ol style="list-style-type: none"> <li>1. Not quite ready to release</li> <li>2. Requires user to select an answer for all items before continuing.</li> </ol>	<ol style="list-style-type: none"> <li>1. User cannot preview Checkpoints in this system</li> <li>2. User must select any answer for each item before they can view the</li> </ol>	<ol style="list-style-type: none"> <li>1. Visit Author/Create&gt;&gt;Tests to view the first 2 forms of each Checkpoint</li> <li>2. Select an answer, any answer, for an item, before selecting Next to</li> </ol>

System	Issue	Impact to User	Suggested Work Around
		next item.	go to next item.
<b>Reporting</b>	Results for Checkpoint tests are not yet displaying % correct.	User will only see raw scores for Checkpoint results for now.	View the raw score results and keep in mind that the total number of points on each form may vary slightly.
